SKILLS

Frontend Development (HTML, CSS, Javascript, TypeScript, ReactJS, PolymerJS)

Backend Development (.Net, NodeJs, ExpressJs, C#)

Source Code Management (Git, Github, Azure DevOps)

Database Management (SQL Server, MySQL, MongoDb, Firebase)

Soft Skills (Problem solving, Active listening, Adaptability, Innovation, Teamwork, Flexibility)

ABOUT ME

I'm a software developer with expertise in various programming languages such as HTML, CSS, Javascript, TypeScript, C#, SQL and NoSQL. I have experience in building scalable, secure and reliable web and desktop applications using various frameworks and technologies from scratch. I enjoy solving complex problems and learning new skills. I am passionate about creating high-quality code that follows best practices and industry standards. I am always looking for new challenges and opportunities to grow as a developer.

While I excel in software development and approach tasks with a 'can do' attitude, I recognize the need to improve my verbal communication skills. I am attentive and have a keen ability to understand client needs, yet I acknowledge that articulating my thoughts clearly is an area for development. I am eager to find opportunities that will allow me to not only refine my programming skills but also enhance my interpersonal skills, ensuring that I can contribute to my fullest potential.

WORK EXPERIENCE

AUG 2023
PRESENT

SOFTWARE DEVELOPER
Freelance

- Developed online voting system, enhancing member engagement and streamlining the election process.
